

H735, HX38, HX48, HX58 SERIES

Status and Control in One Package

The Hawkeye Relay Combination Series is the ideal solution for the automation installer. These units combine a current switch and relay into a single package, reducing the space required for total control of fans and pumps. The current switch and relay operate independently of one another. These devices allow start/stop control and status monitoring with one device instead of two.

Combined relay & status

Combines command relay and fan/pump status sensor in a single, easy-to-install unit

Fan & pump status

Detect belt loss and motor failure...ideal for fan and pump status

Polarity insensitive

Polarity insensitive status outputs...fast and easy installation

APPLICATIONS

- Starting/stopping and monitoring positive status of motors
- Detecting belt loss and coupling shear

Two outputs

H748 and H948 feature a SPDT command relay...control two outputs with a single relay

Added flexibility

Bracket on H938, H948, and H958 can be installed in three different configurations

Easy setup

Relay and status LEDs

DETECTS BELT LOSS/COUPLING SHEAR!

Now you can easily detect when drive belts slip, break, or pump couplings shear. In fact, a typical HVAC motor that loses its load has a reduction of current draw of up to 50%. That's why our sensors are the industry standard for status.
